

## **Screen: Sites**

### **Description:**

You need to develop the following screen in React.js. (See the screen shot in the bottom)  
You will not have to do the complete layout but only the form. The dashboard, sidebar, header etc. are already built in. You just need to add the form.

I will provide you the template project where you will work at. This template project has all of the basic layout set up, basic components like text input field, radios buttons, are already built up.

You will work inside the directory:

```
src/components/modules/Organization/Employee/Sites
```

Here you will find an `index.js` file.

Right now, there will be a simple div with hello world written inside of it.

The component should contain only the content you see under 'Sites' tab.

Here there is a search field. Where user can search data i.e. sites shown in the table below. The two buttons work as filter. In default state they will be red. When clicked on, they will turn into black. If clicked on 'show preferred only', it should just show data which are preferred. Same goes for 'Blacklisted guard')

For now create an async function in the component, which returns dummy data (which is provided in the bottom)

You can view the result via the route: `/org/employee` and inside the **Sites** tab

For text input field, radio button field, and others use built in components. You can see all of the built in components in the `src/components/basic` and `src/components/common` directory.

**Please prefer built in components when necessary.**

**Please do not work outside of the *Sites* directory.**

**Avoid custom css. Use only tailwind css.**

### **Other requirements:**

React.js ^18.2.0

TailwindCSS ^3.2.1

Employee Details

HR Details

Sites

Licences / Compliance

Staff Documents

Select the sites that Aaron can work in:

Q

Enter emergency detail...

Show Preferred Only

Blacklist Guard (all sites)

Site Name	Blacklist	Preferred
1 Charter Hall - CH - Cambeltown Mall	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Training	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Mall	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Training	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Mall	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Training	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Mall	<div></div>	<div></div>
1 Charter Hall - CH - Cambeltown Training	<div></div>	<div></div>

Dummy Data:

```
[
  {
    id: 1,
```

```
    name: '1 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: false,
  },
  {
    id: 2,
    name: '2 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: true,
  },
  {
    id: 3,
    name: '3 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: true,
    isPreferred: false,
  },
  {
    id: 4,
    name: '4 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: false,
  },
  {
    id: 5,
    name: '5 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: true,
  },
  {
    id: 6,
    name: '6 Charter Hall - CH - Cambeltown Mall',
```

```
    isBlackListed: false,
    isPreferred: false,
  },
  {
    id: 7,
    name: '7 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: true,
  },
  {
    id: 8,
    name: '8 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: false,
  },
  {
    id: 9,
    name: '9 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: false,
  },
  {
    id: 10,
    name: '10 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
    isPreferred: false,
  },
  {
    id: 11,
    name: '11 Charter Hall - CH - Cambeltown Mall',
    isBlackListed: false,
```

```
        isPreferred: false,  
    }  
]
```
